WORK EXPERIENCE

Software Development Intern

ALX Africa   April 2023- Present

- I proficiently write clean, efficient, and well-documented code to deliver software solutions that align with project requirements.
- I actively engage in collaborative efforts within the development team, fostering a culture of open communication and constructive feedback, leading to improved project outcomes.
- I display a proactive approach to staying abreast of the latest technologies, incorporating cutting-edge tools and industry best practices into project development, thereby enhancing the overall efficiency of the team.
- I actively seek mentorship and engage in training sessions, consistently demonstrating a commitment to personal and professional growth, which significantly contributes to the enhancement of my technical skills and overall performance.
- I prove to be adaptable to dynamic project requirements, showcasing a willingness to undertake various challenges and consistently delivering results that positively impact project outcomes.
- I effectively communicate with team members, actively participating in discussions to address challenges, offer insights, and propose innovative solutions, fostering a collaborative and productive work environment.

Business Development Manager

Vee Clothing Company   Dec 2021 - March 2023

- Formulate comprehensive digital marketing strategies, including content creation, SEO implementation, and social media management.
- Analyzing campaign performance data and user engagement metrics to drive informed decision-making and improve overall marketing effectiveness.
- Orchestrate effective paid advertising campaigns, manage email marketing initiatives, and optimize conversion rates for enhanced customer engagement.
- Stay abreast of industry trends and implement marketing automation tools to streamline processes and ensure a competitive edge in the dynamic digital landscape.
